

Gear Technology. Worldwide.

**My ideas. My skill.
My chance.**

Achieving challenging goals together: with around 3,100 employees worldwide, IMS Gear develops and produces specific drive solutions for international customers. In addition to the industry focus automotive, the focus is on applications for industry and e-mobility concept. We need your ideas and your skills at the **location Osijek**.

Cloud Data & Infrastructure Engineer (m/f/d) - Osijek (HR)

YOUR TASKS

- Consolidation, cleaning and transformation of heterogeneous data sources (mainly SQL) to provide data-driven models and analyses
- Design, implementation, and support for deploying machine learning models into production environments
- Setup, configuration and management of server applications (virtual machines, containers, Azure cloud services)
- Further development and automation of the software development and deployment environment (CI/CD pipelines)
- Management of user rights, licenses and security policies within the Azure infrastructure
- Package management and maintenance of open-source libraries and dependencies
- Setup, maintenance, and optimization of Git environments and version control systems
- Operation, monitoring, and maintenance of web applications and cloud services

YOUR QUALIFICATIONS

- Solid experience working with databases and integrating various data sources (SQL, possibly NoSQL)
- Practical knowledge in using and administering Microsoft Azure services (Compute, Storage, Networking, Security)
- Experience with container technologies such as Docker and ideally Kubernetes
- Confident handling of version control systems (Git) and CI/CD tools
- Knowledge in adapting and integrating system interfaces (APIs, ETL processes)
- Basic programming skills (e.g., Python) for automating processes
- Understanding of IT security and compliance in cloud environments
